

Dental Lab Dept.

What Makes Our Lab Different

1. Clinician-Backed Expertise

Our lab is founded and supported by a Board-Certified Prosthodontist who understand your needs firsthand. There is only the best materials and products used.

2. Seamless 24/7 Communication

Connect anytime through our app. Share photos, updates, and messages with our team. Time is never a barrier.

3. FDA-Approved Workflows

Every process follows strict FDA standards, ensuring safety, compliance, and reliability. All implant parts are Original manufacturer or FDA approved 3rd party depending on your specifications.

4. Medical-Grade Zirconia, Made in the USA

Each puck is independently measured for shrinkage, accuracy and consistency, guaranteeing top-quality results. All Zirconia is 100% medical grade and manufactured in San Diego.

5. Fully Digital Solutions

From start to finish, we are 100% digital—and we'll support you every step of your digital transformation journey. We help you optimize your office workflow

6: Transparent and fair pricing.

We believe in a flat profit structure for the work we do. Hence all implant restorations are priced differently as the implant parts are priced differently.

7: NVDS Member special.

NVDS members will receive one implant crown and two tooth crowns at no charge as a trial. Our product-to-product pricing is typically 15–20% lower than most labs, providing significant cost benefits for members. In addition, all NVDS members will receive 3% cash back quarterly. If a member chooses to donate their cash-back amount to the VDA PAC, The Center: Dental Lab will contribute an additional 2% in their name to further support legislative advocacy on behalf of Virginia's dentists.

Price Sheet

Simple crown and bridge

Up to 5 units at a time on a single patient. Gold restorations are all milled and follow a 100% digital process just like ceramic.
